S'kapade Styling Tips for Summer!

- Always make sure that your hair is bone dry before applying any heat styling products; including straighteners, curlers and heated rollers.
- Use a heat protector or leave in moisturizer before your drying hair, to keep it feeling great!
- Regularly clean and de-hair brushes and styling tools, this will prevent any damage to your tools and avoid fire and safety hazards.
- A messy braid is ideal for keeping your hair under control and minimizing exposure to the sun. Tight hairstyles can be damaging because they tend to pull and tear hair, especially if your hair is dry from the summer heat.
- Frequent washing strips your scalp of its natural oils, which in turn stimulates additional oil production and makes you feel the need to wash it even more. Try just rinsing in the shower after a day at the beach or pool, and see if that gets rid of some extra oil.
- Use some coconut oil to smooth, de-frizz, and moisturize your locks after washing. The oil will give some shine and, if you have wavy hair, create natural, air-dried curls. Or put some coconut oil in your hair before you wash it, and leave it for at least 30 minutes. This will help with dry ends!

Follow these easy tips to keep your hair looking healthy and fresh!

MILKMAID BRAID 101

Hair Style of the Season!

This year braids have been making an appearance both on and off the red carpet. They have been one of the biggest trends of the year! We love braids because they are easy to do, and you can wear it on date night or night out without looking overdressed. The best thing about braids: there are so many ways you can wear them! Rock yours in a chignon, wrapped around a topknot or even upside down! Get creative and try a braid next time you need a change! If you are unsure of doing your own braids, come into the salon and our talented team can help you out with some funky styles, and even teach you how to do them on your own! Here is how to do a simple milkmaid braid for you to try at home! A cool thing about milkmaid braids is that they look just as gorgeous from the back as they do from the front! Let a few wispy strands go free to give your milkmaid braids a more romantic, casual finish.
